

TECHFINE has become new agent of KREYENBORG for Brazil

SENDEN, GERMANY, August 01, 2016: Techfine, an engineering company with expertise in systems for film and sheet extrusion, pipes, compounding and profile extrusion has become the agent in Brazil for Kreyenborg Plant Technology GmbH Co. KG, it was announced today.

Techfine will represent the Kreyenborg complete product range for the plastic industry – Dryer, mixer, silos, dosing equipment, feeding systems, big-bag-stations and Turn-key-solutions for material handling. Techfine will provide sales and support services.

“Our customers in Brazil will benefit from Techfine’s extensive experience representing leading European suppliers of extruders and production lines for pipes, film, sheet, compounds and profiles” said Jan Hendrik Ostgathe, Managing Partner of Kreyenborg Plant Technology GmbH Co. KG. “Drawing on their engineering expertise, they can provide services ranging from technical support for individual products to contracting of complete turnkey bulk-material or drying system.”

Techfine is a sales and technical service company located in São Paulo, Brazil, dedicated to commercialize plastic machinery for different market segments such as construction, packaging, food and automotive, with focus on extrusion technology. The Techfine team has more than 15 years of experience working in complete Latin America with leading machinery suppliers of extrusion systems, as well as up and downstream equipment, providing sales and after sales services with own local technical engineers.
