

Cooperation with VGT Polska in Polish Plastics Sector

Now also present in Poland: KREYENBORG Sales Agency

KREYENBORG GmbH & Co. KG from Senden, Germany, responded to the rising demand for its machine components in the plastics sector by implementing another sales cooperation. Newly joined VGT Polska Sp. Z.o.o. from Krakow has increased the company's number of European partners to 20, who work for the benefit of KREYENBORG's customers in field and give them assistance in all issues concerning sales and service.

VGT Polska has already a wealth of experience in the plastics sector. Their team represents producers of raw materials and additives as well as Masterbatches, and machine manufacturers of peripheral equipment. Thanks to their collaboration with KREYENBORG, VGT Polska have extended their large product range by Infrared Rotary Drums IRD, Dryers, Mixers and Silos. This local support yields benefits to all KREYENBORG customers, such as short response times, high availability of spare parts and fully trained service technicians.

The company KREYENBORG is known for its IRD Infrared Rotary Drums, which are built according to the customers' specific needs with respect to the dimensions and heating capacities and which work either continuously or in batches. They are used for drying, crystallizing and coating of pellets, flakes, fluff or mixtures of all of them. But many more machine components are part of the product range. Indeed, KREYENBORG offers the whole range of components, including Silos, Mixers, Dosing Units and Conveying Solutions, which are needed in plastics processing. It goes without saying that also complete solutions are available, in which all machine components are perfectly matched including control technology.
